

# PASCHAL AR app

Product Information

**PASCHAL**

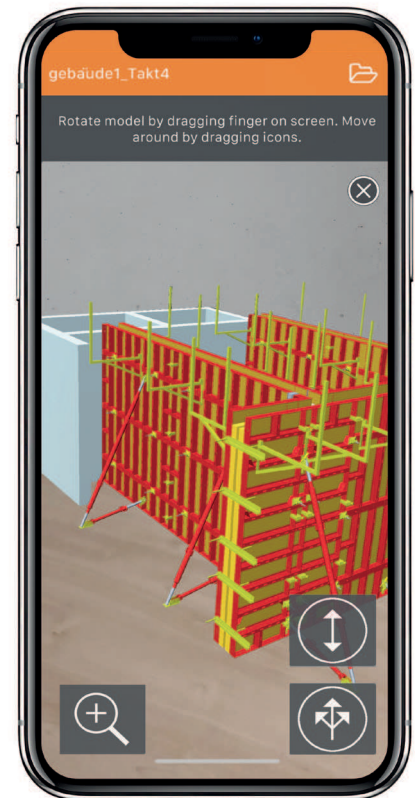

Service in Formwork + Shoring

# PASCHAL AR app

## Ideas and plans become reality with the PASCHAL AR app

The PASCHAL AR app makes it possible to present the planned formwork solution in original size on an area in real surroundings by means of a smartphone or tablet.

- **Mobile use of digital models**  
The PASCHAL AR interface integrated in PPL 12.0 makes everything totally consistent from the 3D formwork model across all process steps through to the construction site. The result in the AR app shows the respective current state of planning – this makes formwork even easier and verifiable for the construction management team according to the current planning.
- **Can be used to illustrate product and user training sessions**
- **Makes optimal use of the PASCHAL products and increased safety on the construction site possible**
- **Available for iOS, in the future also for Android**
